

31. Oct. – 2. Nov. 2020 PhD course **3. – 4. Nov. Research forum**

Building on community-based perspectives on health research and well-being

Greenland Center for Health Research, University of Greenland, invites PhD students to apply for attending our PhD course on Indigenous knowledge, ethics and innovative community-based research methods in the Arctic. Besides lectures you will be challenged to develop your knowledge on case-examples and include your own research experiences. After the PhD course, you are welcome to also attend GCHR's research forum 3.-4. Nov.

We anticipate making lectures available online for PhD students and researchers, who are unable to travel. If sufficient applicants wish to participate online, we will consider organizing online forums for discussions as well.

The perspectives of communities are crucial for increasing the well-being of the population and individuals. Health research in Greenland has increasingly moved towards co-creation. The aim is to build on partnerships with communities and to base studies on communities' strengths.

PhD course topics: • How to make your research visible and create sustainable research networks • Implementation of research results • Community-based approaches in both quantitative and qualitative research • Indigenous knowledge and ethics in research in the Arctic • Sharing circles as method

Greenland Center for Health Research

Institute for Nursing and Health Sciences, University of Greenland

Send applications and questions to healthresearch@uni.gl

Application deadline
1st of September 2020

Preliminary program

This is a preliminary program to provide an overview of the topics that will be discussed and researchers that are expected to participate. We reserve the right to make changes.

Date	Topics	Lecturers
Friday 30.oct.	Arrival and welcome dinner	
Saturday, 31.oct. PhD course	Ethics in the Arctic communities Indigenous knowledge Ethics in your own PhD project (presentations and discussions)	Christina VL Larsen Lene Seibæk Gwen Healey Ingelise Olesen Jon Pettar Stoor Siv Kvernmo
Sunday, 1.nov. PhD course	Community-based approaches in quantitative and qualitative research <ul style="list-style-type: none">○ Sharing Circle○ Referencegroup○ Quantitative studies Register-based studies	Jon Pettar Stoor Gwen Healey Ingelise Olesen Marit E. Jørgensen Michael L Pedersen
Monday, 2.nov. PhD course	Implementation of research results How to make your research visible and create sustainable research networks (panel of senior researchers) Lessons-learned from Covid-19	Lene Seibæk Christina VL Larsen Henrik Hansen Anders Koch Gwen Healey
Tuesday, 3.nov.	Research forum	
Wednesday, 4.nov.	Research forum
